

## Why Choose Us

Since 1995, ECCO Select has partnered with organizations across industries to deliver high-impact IT solutions in both the public and private sectors. Headquartered in Kansas City with offices in Dallas, Washington, D.C., and New York, we bring globally recognized expertise as an ISO and CMMI-certified, cleared facility and MBE/WBE-certified organization. As a women-owned, minority-owned business, we remain committed to being industry-agnostic and people-centric, blending technical excellence with a philanthropic culture that puts people first in every engagement.

## About ECCO Select

**30 Years** of Delivering Excellence

National technology solutions provider delivering **Advisory, Professional, and Talent Services** across public and private sectors.

**Certified MBE/WBE** and **cleared facility**, ISO and CMMI Level 3 certified for quality and delivery excellence.

## Our Services

### Software Advisory Services

- Delivers financial and operational intelligence that powers smarter modernization-transforming software spend insights into fuel for our cloud, DevOps, and talent solutions.

### Professional Services

- Turns modernization strategy into measurable results by designing, building, and operating the cloud, automation, and data platforms that power enterprise performance.

### Talent Solutions

- Provides the skilled people and scalable delivery models that sustain modernization by extending our clients' capacity to execute and evolve without disruption.

## Software Advisory Services

**Advisory services that help organizations optimize software licensing, reduce risk, and control cost.**

- Licensing oversight, audit support, and compliance management.
- Vendor negotiation and contract optimization.
- Renewals, procurement guidance, and entitlement management
- Cloud migration and hybrid-environment advisory
- Subscription management for SaaS, PaaS, and IaaS
- Cost-usage analysis to reduce cloud and infrastructure spend

## AI Enablement

- Enterprise AI strategy aligned to business outcomes
- Applied GenAI solutions, intelligent automation, and secure deployment

## Cloud Modernization

- End-to-end cloud migration and stabilization supported by CloudOps automation, governance controls, and modern DevSecOps/CI-CD practices.

## Modern Application Development

- Application modernization and full-stack development services that support cloud migration, legacy transformation, and AI-assisted or low-code development.

## Talent Solutions

### Strategic Digital & IT Consulting

- Empower modernization and transformation initiatives in a market where global tech workforces are projected to grow 2x faster than the overall U.S. labor market over the next decade

### Flexible Staffing Models

- Offer scalable staffing options—including staff augmentation and project-based teams—to align workforce capacity with evolving business needs.

### Workforce Optimization

- Support workforce planning through the assessment of current skills, identification of gaps, and implementation of targeted talent-development strategies

## Professional Services

### Government Contracting

- Federal IT modernization and cloud support delivered with FedRAMP/FISMA-aligned compliance, mission continuity, and program oversight.

### Program Management & Governance

- PMO leadership ensuring execution quality
- Portfolio and risk oversight with strong governance models

### Enterprise Observability

- Enterprise monitoring, alerting, and SLO optimization across platforms
- AI/LLM observability, cost transparency, and FinOps-driven optimization

### Accelerated Hiring Support

- Reduce time-to-hire by supplementing internal recruiting teams and sourcing candidates with specialized technical expertise.

### Critical Skills Placement

- Overcome scarcity of top-tier talent in a market where tech unemployment remains exceptionally low, driving unprecedented competition.

### Productivity & Efficiency Gains

- Reduce delivery risk by providing vetted resources who quickly integrate into workstreams, enhancing team productivity and accelerating project outcomes as digital transformation remains the top driver of IT talent demand.
